

Rubas Hussain

FLUTTER DEVELOPER

PROFILE

I am a Flutter developer with over 2 years of experience in building dynamic and user-centric mobile and web applications. Proficient in Dart programming and adept at utilizing state management tools like GetX and Provider to deliver high-performance, responsive solutions. Experienced in integrating APIs, managing Firebase services, and designing intuitive user interfaces. Passionate about writing clean code especially using MVVM and MVC architecture, solving complex problems, and continuously enhancing skills to keep up with the latest industry trends.

EDUCATION

Bachelor of Software Engineering | 2022 - 2025

University of Karachi

A Levels | 2017 - 2019

Falcon House Grammar School

WORK EXPERIENCE

Sofcodix | Dec 2023 - Jan 2025

Junior Flutter Developer

- Built scalable, high-performance Flutter apps for mobile and web, aligned with client needs. Collaborated with Django backend and design teams to integrate APIs and deliver smooth user experiences. Optimized frontend performance and deployed multiple apps to the Google Play Store and Apple App Store.

iPlexSoft | Jan 2025 - Dec 2025

Mid-Level Flutter Developer

- Mid-level Flutter developer with experience of guiding a team of interns in designing, developing and debugging.
- Integrated WebSockets for real time tracking in a logistics delivery application including background location syncing.
- Actively engaged in debugging and code review sessions with interns to identify issues, optimize performance, and maintain clean architecture.

DevDefy | October 2025 - Present

Mid - Level Flutter Developer

- Worked on multiple applications with apps already having a certain user base on both Play store and App store. Maintained them by adding new features in apps and optimizing the performance.
