

Rubas Hussain

SENIOR iOS DEVELOPER

PROFILE

I am a iOS developer with 4+ years of experience building scalable, user-centric mobile applications. I have contributed to the development and maintenance of 15+ production apps, including platforms serving 15,000+ daily active users, where I have a significant stake in delivering features with a strong focus on performance, reliability, clean architecture and less bugs. Proficient in Swift, SwiftUI, UIKit, MVVM, MVC, and modern iOS development practices, I follow MVVM and MVC architectural patterns to write maintainable, testable code. Moreover, I too have worked on cross platform frameworks such as Flutter to ensure mobile app be developed for both Android and iOS in less amount of time. I have hands-on experience integrating REST APIs, working with Firebase services and implementing features such as real-time tracking, background services, and push notifications.

EDUCATION

Bachelor of Software Engineering | 2022 - 2025

University of Karachi

A Levels | 2017 - 2019

Falcon House Grammar School

WORK EXPERIENCE

DevDefy | August 2025 - Present

Senior Mobile Engineer (iOS & Flutter)

- Managed the development of multiple applications across diverse domains, delivering scalable and high-performance solutions while maintaining code quality and timely releases. Designed robust architectures for thousands of users, focusing on scalability, performance optimization, memory leak prevention, debugging, and modernization of legacy codebases.

Aman Albilad Systems | أنظمة أمان البلاد | Dec 2023 - July 2025

Mid - Level Mobile Application Developer (iOS & Flutter)

- Mid-level Mobile App developer with experience mentoring interns in designing, developing, and debugging applications. Implemented WebSockets for real-time tracking in a logistics delivery app with background location syncing, and actively participated in debugging and code reviews to optimize performance and maintain clean architecture.

iPlexSoft | Jan 2023 - Dec 2023

Mid - Level Mobile Application Developer (iOS)

- Worked on multiple production applications with an existing user base, contributing to ongoing maintenance, feature enhancements, and continuous performance optimization.

Sofcodix | Jan 2022 - Feb 2023

Junior iOS Developer

- Built scalable, high-performance iOS apps for mobile, aligned with client needs. Collaborated with Django backend and design teams to integrate APIs and deliver smooth user experiences. Optimized frontend performance and deployed multiple apps to the Apple App Store.

Rubas Hussain

iOS DEVELOPER

TECHNICAL SKILLS

Swift & iOS Development: Swift, SwiftUI, UIKit, Object-Oriented Programming (OOP), Protocol-Oriented Programming, Async/Await, Grand Central Dispatch (GCD), Closures, Optionals, Error Handling, Codable, URLSession, MVVM, MVC, Clean Architecture.

State Management & Architecture: MVVM, MVC, Dependency Injection, ObservableObject, @State, @Binding, Combine.

Database: Core Data, UserDefaults, SQLite, Firestore, Realtime Database, .

Firebase: Authentication, Firestore, Cloud Functions, Cloud Messaging (FCM).

Dart & Flutter Development: Dart, Flutter, Asynchronous Programming, Null Safety, Type Safety, Streams, Futures, Isolates, OOP, Functional Programming, Clean Code, API Integration.

Third-Party Integrations: Google Maps, Live Location Tracking, AI Integration, Payment Gateway Integration, Chat Integration, Audio/Video Calling, HealthKit / Health Connect Integration.

Version Control: Git, GitHub.

Development Tools: Xcode, VS Code, Android Studio, Postman, Figma, Jira, Microsoft Teams, Google Meet.

Deployment & Distribution: Apple App Store Connect, TestFlight, Google Play Console.

PROJECTS

Load Secure

- Architected and delivered a cross-platform real-time shipment tracking system using foreground services and background location synchronization, ensuring uninterrupted live tracking of drivers, accurate delivery predictions, and optimized battery usage with automatic privacy-safe tracking termination upon delivery. Currently used by **10,000+** users/drivers daily.

AppStore: <http://apps.apple.com/pk/app/load-secure/id1526466951>

Motiv Teams

- Motiv Teams is a mobile platform designed to simplify high school sports team management. It centralizes communication, scheduling, and coordination to reduce administrative workload for coaches and staff. Currently with **3,500+** daily active users.

AppStore: <https://apps.apple.com/us/app/motiv-teams/id6738299992>

Salaati

- Built a location-based Islamic utility app that helps users find nearby masjids, view accurate prayer times, get real time notifications, and determine Qibla direction. Integrated Google Maps, personalized filters, and event alerts for a seamless user experience.

AppStore: <https://apps.apple.com/pk/app/salaati/id6743207975>

Apaale

- Developed a cargo shipment logistics app enabling real-time trip tracking with Google Maps live navigation and websocket with multiple payment options for smooth logistics operations.

AppStore: <https://apps.apple.com/pk/app/apaale/id6502597789>

Track My Work: HRMS Tracker

- Track My Work is a smart HRMS app that simplifies attendance, time tracking, and leave management for employees and HR teams through a single intuitive dashboard.

AppStore: <https://apps.apple.com/us/app/track-my-work-hrms-tracker/id6749223345>

Digi Host - Domain & Hosting Management System

- Developed a scalable domain and hosting management application for businesses, IT teams, and freelancers to efficiently track and manage multiple client services within a centralized platform.

AppStore: <https://apps.apple.com/pk/app/digi-host/id6746712593>
